

**Amendments to the Claims:**

This listing of claims will replace all prior versions and listing of claims in this application.

**Listing of Claims:**

74. (Currently Amended) A wrapped [[an]] article comprising:  
an article;  
a stretch film;  
wherein the stretch film is elongated to the yield plateau and less than the natural draw ratio; and  
the article is wrapped with the stretch film, the stretch film comprising:  
at least one first layer; and  
at least one second layer not comprising a LDPE, wherein any one or more layers comprises a polyethylene copolymer with a Compositional Distribution Breadth Index (CDBI) of at least 70%, a melt index  $I_{2.16}$  of from 0.1 to 15 g/10 min., a density of from 0.910 to 0.940 g/cm<sup>3</sup>, a melt index ratio  $I_{21.6}/I_{2.16}$  of from 30 to 80, and an Mw/Mn ratio of from 2.5 to 5.5 and from 0.25 to 6 wt% of one or more tackifiers, wherein:  
the film having a natural draw ratio of at least 250%, a tensile stress at the natural draw ratio of at least 22 MPa, and a tensile stress at second yield point of at least 12 MPa, as measured according to ASTM D-882/97; and  
the film having a yield plateau having a linear portion with a slope of at least 0.020 MPa per % elongation interposed between the second yield point and the natural\_draw ratio.

75. (Previously Presented) The wrapped article of claim 74, wherein the film has a dart impact strength D, a modulus M, where M is the arithmetic mean of the machine direction and transverse direction 1% secant moduli, and a relation between D in g/μm and M in MPa such that:

$$D \geq 0.0315 \left[ 100 + e^{(11.71 - 0.03887M + 4.592 \times 10^{-5}M^2)} \right].$$

76. (Previously Presented) The wrapped article of claim 74, wherein the tensile stress at the natural draw ratio is at least 26 MPa, and the natural draw ratio is at least 300%.
77. (Previously Presented) The wrapped article of claim 74, wherein the film has a tensile stress at first yield of at least 9 MPa, and a second yield of at least 14 MPa, both yields measured according to ASTM D-882/97.
78. (Previously Presented) The wrapped article of claim 74, wherein the CDBI is at least 85%; the melt index ratio is from 35 to 60; and the Mw/Mn ratio is from 3.0 to 4.0.
79. (Previously Presented) The wrapped article of claim 74, wherein the melt index is from 0.3 to 10 g/10 min, and the density is from 0.918 to 0.935 g/cm<sup>3</sup>.
82. (Previously Presented) The wrapped article of claim 74, wherein the stretch film is provided in a pre-stretched condition.
